Key Points and Issues For June 2009

Director's Note

The pension fund ended the fiscal year at \$63.2 billion, with an investment return of -14.2%. This compares favorably to our benchmark return of -16.5% (i.e., the return we would have realized if we had strictly followed the Council's investment plan allocation, and had performance in-line with the market in each asset class). While other state pension funds have yet to publish actual returns for the fiscal year, various surveys we have followed throughout the fiscal year lead us to believe that our performance will rank in the top quartile (or better) relative to other public funds.

To put the fiscal year into perspective, the return on the S&P 500 Index (-26.2%) for the 12-month period ending on June 30 was the worst return since 1932. The returns for international equity and the spreads on investment-grade bonds and high yield debt also reached their widest levels since the Great Depression. For a while, long-term U.S. Treasuries were a safe haven – they were up by 22.0% for the first six months of the fiscal year (July-December 2008). But, U.S. Treasuries yields rose significantly in 2009 over concerns about massive issuance, and Treasuries returned -12.0% for the first six months of 2009.

The Division took significant steps in order to minimize the negative impact of historical market losses on the State's pension fund. We entered the fiscal year with a very high cash position (more than 7%), and were significantly underexposed to financial services stocks in our domestic and international equity portfolios. After the credit markets shut down in the fall of 2008, we took major steps to shore up several investments in funds concentrating in bank loan investments, and made a major shift out of U.S. Treasuries into investment-grade corporate bonds. Both moves resulted in double-digit returns through June 30, 2009. Finally, in the spring of 2009, we started to shift both the domestic and international portfolios out of defensive issues into sectors that are more "geared" to an economic recovery. This shift allowed both portfolios to fully participate in the strong market rebound that commenced in March 2009.

Total Pension Fund

- For the month of June, the fund was up 1.11% versus 1.25% for the benchmark. (Note: The benchmark starting in January 2009 is based on the new asset allocation plan adopted by the State Investment Council in December 2008.) Estimated performance for the pension funds for the fiscal year-to-date ending on June 30, 2009 is -14.23% versus -16.48% for the Council benchmark. Our outperformance for the fiscal year is attributable to (1) our overweight position in domestic and international fixed income relative to public equities for most of the fiscal year, (2) our underweight position in commodities relative to the benchmark (which are down 44% for the fiscal year), (3) our underweight position in financial services stocks in both our domestic and international equity portfolios,

and (4) our large shift into corporate bonds late in 2008. Total pension fund assets as of June 30, 2009 were \$63.2 billion, up from \$62.9 billion as of May 31, 2009.

- The major activity in June was again in the international equity developed markets portfolio, where we were net buyers of \$218.2 million. Within this net amount, we were net buyers of \$954.1 million of Japanese equities, consisting of a broad basket of individual securities designed to replicate the MSCI Japan index. These purchases were partially offset by significant sales of European telecommunications and consumer products stocks. We were net sellers in June of \$41.2 million in U.S. equities in Common Pension Fund A, consisting of sales of telecommunications and health care stocks, partially offset by purchases in the railroad and defense industries. Within our domestic fixed income portfolio, we were net sellers of \$284.6 million, consisting of \$375.5 million in sales of investment-grade corporate bonds partially offset by purchases of TIPS and nominal U.S. Treasuries. Finally, we funded an additional \$95.6 million in commitments to various alternative investments in June.
- For the fiscal year, we transferred \$1.45 billion out of Common Pension Fund A (domestic equities), \$600 million out of Common Pension Fund B (domestic fixed income), and \$450 million out of Common Pension Fund D (international). Of these amounts, \$1.725 billion was transferred into Common Pension Fund E (alternatives) and \$775 million was transferred into the pension fund cash balances to fund net benefit payments.

Domestic Equity

- Performance for Common Pension Fund A for June was 0.26% versus 0.31% for the S&P 1500 Index, the benchmark for the domestic equity portfolio. For the fiscal year, Common Pension Fund A returned -22.84% versus -26.24% for the benchmark.
- As stated above, net sales of equities in the portfolio in June were \$41.2 million. Net sales were concentrated in the telecommunications (\$152.8 million in sales) and health care sectors (\$64.4 million in sales). Major issues that were sold include AT&T (\$170.4 million), Medtronic (\$26.4 million), the iShares REIT ETF (\$24.0 million) and Google (\$19.6 million). These sales were partially offset by purchases in the transportation, defense and industrial sectors. Major purchases include CSX (\$84.4 million), 3M (\$33.1 million), JP Morgan Chase (\$27.8 million) and Ameriprise (\$27.4 million).
- As of June 30, 2009, the portfolio is overweight in the basic materials, health care and consumer staples. The most significant underweight sector continues to be financial services, where actual exposure is only 12.4% versus 14.1% for the S&P 1500 Index.

- Based upon our review of the various factors as set forth in the State Investment Council Regulations, we will classify United America Indemnity Ltd., which is incorporated and headquartered in the Cayman Islands, as U.S. based and hold this investment in Common Pension Fund A.
- Covidien Ltd. has obtained shareholder approval to change their incorporation to Ireland and will no longer be included in the S&P Index. Based upon our review of the various factors as set forth in the State Investment Council Regulations, we will continue to classify Covidien Ltd. as U.S. based and hold this investment in Common Pension Fund A.

Domestic Fixed Income

- Performance for Common Pension Fund B for June was up 3.09%. Excluding our TIPS and high-yield portfolios contained within Common Pension Fund B, performance was 3.28%. This compares to 3.43% for our new custom benchmark for domestic fixed income, the Barclay's Long Government/Credit Index (which also excludes TIPS and high yield) with a 50% weight for U.S. Government securities. For the fiscal year-to-date period, Common Pension Fund B (excluding TIPS and high yield) returned 6.64% versus 7.38% for the council benchmark (which prior to January 2009 was the unadjusted Barclay's Long Government/Credit Index). The duration of Common Pension Fund B (excluding TIPS) was 10.16 years as of June 30, 2009, versus 11.54 years for the adjusted Barclays Long U.S. Government/Credit Index.
- Our high yield portfolio, which now includes the long-only bank loan funds that were transferred from Common Pension Fund E, was up 3.77% for June versus 2.86% for the Barclays High Yield Index. The high yield portfolio is up 34.88% for calendar year 2009. The TIPS portfolio was up 2.35% as concerns over potential increases in inflation drove strong returns relative to nominal U.S. Treasury securities.
- We had net sales of approximately \$284.6 million of domestic fixed income securities in June. The major activity was in the investment grade corporate bond portfolio, where we had net sales of \$375.5 million. While we still believe that corporate bonds offer value, we decided to take profits as corporates are up by over 21% since November 2008 (when we made major shift into corporate bonds). Major names that were sold include Allstate, Bristol Myers, Caterpillar, Duke Energy, Halliburton, Honeywell, Illinois Power, Eli Lilly, Verizon and Virginia Electric. Partially offsetting these sales were net purchases of TIPS (\$73.3 million) and nominal U.S. Treasuries (\$17.6 million).

International Equity/Fixed Income

- Common Pension Fund D returned -1.29% in June versus a return of -0.28% for the MSCI EAFE Index ex-Prohibited, the benchmark for the international

portfolio, which is calculated by the Division and excludes those names deemed ineligible for investment under the State's Sudan and Iran Divestment Laws. For the fiscal year, the portfolio was down -24.0% versus -31.2% for the benchmark. The equity portion of Common Pension Fund D returned -31.2% for the fiscal year, while international sovereign debt returned +19.7%.

- We were net buyers of \$218.2 million in international developed markets equities in June, with the major purchases being in the Japanese equity market. Total purchases in Japan were \$954.1 million for the month, consisting of a basket of individual stocks designed to replicate the performance of the MSCI Japan Index. We continue to hedge the currency exposure on a significant portion of these purchases of Japanese equities, with the total hedge now equaling \$2.8 billion. Including these purchases, the portfolio is roughly equal-weighted in Japan relative to the benchmark. Partially offsetting these purchases were net sales in the European telecommunications, utilities and consumer staples sectors. Major names that were sold include France Telecom (\$46.1 million), Anheuser Busch Inbev (\$44.3million), E.on (\$44.2 million), BAT (\$43.5 million) and Glaxo Smith Kline (\$\$42.1 million).
- The net equity purchases discussed above were funded through the sale of European sovereign bonds and the reduction of cash balances in the fund. Total international bond holdings and cash was reduced from \$539.2 million as of May 31, 2009 to \$197.2 million as of June 30, 2009.
- Esprit Holdings Limited while not incorporated in a country included in the MSCI Equity Index Series for developed markets will be classified as a developed market company based upon our review of the various factors as set forth in the State Investment Council Regulations.
- Bejing Enterprises Holdings, which is incorporated in Hong Kong, will be classified as an emerging market company based upon our review of the various factors as set forth in the State Investment Council Regulations.

Alternatives

- During June we funded \$95.6 million of commitments to private equity, and real estate. Major private equity investments include \$20 million to Avenue Special Situations Fund (a distressed debt fund), \$5.6 million to Court Square Capital Partners and \$5.3 million to Partners Group Secondary Fund. The only significant real estate investment was \$5.1 million to PRISA (a core real estate fund managed by Prudential).

Cash Management Fund

- Total assets in the Cash Management Fund were \$14.6 billion as of June 30, 2009. The current yield is 0.61% for state participants (down from 0.67% as of May 31), and 0.51% for “non-State” participants.

Note:

- * Not yet funded as of June 30, 2009
- (1) Represents investments made to the underlying funds plus capitalized expenses (e.g., fees, meal allowances, returns or capital). A portion of the funded amount may not reflect New Jersey Portfolio's remaining commitment to the underlying funds. (2) Represents remaining commitments calculated by subtracting total Capital commitments for investments and income expenses from total commitments held, including unrealized returns of capital. (3) Commitment increased by \$100M on 7/20/06 (5) Commitment increased by \$25M on 3/15/07 (7) Corresponds to \$400 million (8) Corresponds to \$55 million (9) Corresponds to \$100M on 12/20/07 (13) Corresponds to \$100M on 12/20/07 (14) Commitment increased from \$0 to 75 million (15) Contribution excess commitment due to dividends
