Key Points and Issues For September 2009

Director's Note

Even though the employment data (i.e., the national monthly payroll report and weekly jobless claims) still point to softness in the economy, the financial markets continue to react favorably to the likely continuation of easy monetary policy by the Federal Reserve. The linkage between easy monetary policy and strong asset returns is most evident in the changes in value of the U.S. dollar. For the most part, stocks appreciate when the dollar declines in value; the dollar depreciates as investors become more confident that the Federal Reserve will not hike short-term rates for a “considerable period”. As we discussed at the September 2009 State Investment Council meeting, easy monetary policy, coupled with significant cost-cutting by American corporations, could support strong equity returns even though the economy may only “muddle through” with sub-par economic growth in the coming quarters.

The pension fund was up 2.94% for September, slightly lagging the Council’s benchmark return. The fund’s investment-grade fixed income portfolio trailed its benchmark for the month because our duration is somewhat below the index while long-term bond yields fell by 0.15% during the month. For the fiscal year-to-date period, the fund is up 11.62%. The fund ended September at \$68.2 billion, up from \$63.2 billion as of June 30, 2009.

Total Pension Fund

- For the month of September, the fund was up 2.94% versus 3.18% for the benchmark. Estimated performance for the pension funds for the fiscal year-to-date ending on September 30, 2009 is 11.62% versus 11.99% for the Council benchmark. For the fiscal year-to-date period, we underperformed in both our domestic and international equity portfolios due to having a lower risk profile than the overall market. The underperformance was partially offset by our overweight position in stocks, which were the best performing asset class during the quarter. Total pension fund assets as of September 30, 2009 were \$68.2 billion, up from \$63.2 billion as of June 30, 2009.
- The major activity in September was in our domestic equity portfolio, where we were net sellers of \$190.2 million. Within the international equity portfolio, we were net sellers of \$17.4 million. Of note in the international portfolio was a major transition of more than \$900 million out of the iShares Japan exchange-traded fund (the “EWJ”) into a basket of underlying stocks designed to replicate the performance of the MSCI Japan Index. We also significantly reduced our currency hedge on the Japanese yen versus the U.S. dollar. Within the domestic fixed income portfolio, we were net buyers of \$86.8 million, consisting of net purchases of TIPS and Build America bonds, partially offset by sales of U.S. Treasuries and investment-grade corporate bonds. Finally, we funded an

additional \$150.7 million in commitments to various alternative investments in September, including an additional \$50 million to the Schroder Commodity Portfolio.

- We transferred \$500 million out of Common Pension Fund A (domestic equities) into the pension fund cash balances to fund projected net benefit payments.

Domestic Equity

- Performance for Common Pension Fund A for September was 4.18% versus 3.94% for the S&P 1500 Index, the benchmark for the domestic equity portfolio. For the first three months of the fiscal year, Common Pension Fund A returned 15.19% versus 16.05% for the benchmark. Over half of the underperformance for the quarter was attributable to our underexposure to financial services stocks and GE (where financial services represent roughly 50% of total net income) relative to the benchmark.
- As stated above, net sales of equities in the portfolio in September were \$190.2 million. The major activity occurred in the health care sector, where we were net sellers of \$140.0 million. Other sectors with significant net sales were consumer staples and energy. Major issues that were sold include Wyeth (\$79.4 million), Monsanto (\$69.9 million), 3M (\$67.2 million) and Schering Plough (\$36.6 million). These sales were partially offset by purchases of Weyerhaeuser (\$53.4 million), Vulcan Materials (\$52.1 million) and Dow Chemical (\$41.0 million).
- Even though the portfolio remains conservatively positioned, we have been trying to gradually increase our exposure to sectors that should benefit from an improving economy. As of September 30, 2009, the portfolio is overweight in the consumer staples, energy, health care, technology, basic materials, and utilities sectors. The most significant underweight sector continues to be financial services, where actual exposure is only 11.5% versus 15.6% for the S&P 1500 Index.

Domestic Fixed Income

- Performance for Common Pension Fund B for September was up 2.38%. Excluding our TIPS and high-yield portfolios contained within Common Pension Fund B, performance was 2.10%. This compares to 2.51% for the Barclays Long Government/Credit Index (which also excludes TIPS and high yield), which is our benchmark for the fixed income portfolio. For the fiscal year-to-date period, Common Pension Fund B (excluding TIPS and high yield) returned 9.34% versus 8.52% for the Barclays Long Government/Credit Index. The duration of Common Pension Fund B (excluding TIPS and high yield) was 10.61 years as of September 30, 2009, versus 12.19 years for the Barclays Long U.S. Government/Credit Index.

- Our high yield portfolio, which now includes the long-only bank loan funds that were transferred from Common Pension Fund E, was up 5.23% for September versus 5.69% for the Barclays High Yield Index. The high yield portfolio is up 55.82% for calendar year 2009. The TIPS portfolio was up 2.57% in September and 2.79% for the fiscal year.
- We had net purchases of approximately \$86.8 million of domestic fixed income securities in September. Of this amount, we had net sales of nominal U.S. Treasuries of \$124.3 million, net sales of corporate bonds of \$69.2 million, net purchases of \$150.5 million of Build America Bonds, and net purchases of \$129.9 of TIPS. Major sales in the corporate bond portfolio included American Express, Constellation Energy, General Electric, Prudential, PSE&G and WalMart. Build America Bonds that were purchased include Clark County Nevada, Miami Dade County, North Carolina Power Revenue Bonds, and San Francisco City and County.

International Equity/Fixed Income

- Common Pension Fund D returned 3.98% in September versus a return of 3.88% for the MSCI EAFE Index ex-Prohibited, the benchmark for the international portfolio, which is calculated by the Division and excludes those names deemed ineligible for investment under the State's Sudan and Iran Divestment Laws. For the fiscal year-to-date period, the portfolio was up 18.88% versus 20.03% for the benchmark. The equity portion of Common Pension Fund D returned 19.30% for the fiscal year-to-date period, while international sovereign debt returned 6.07%.
- We were net sellers of \$17.4 million in international developed markets equities in September. As noted above, the major activity in the month was in Japan, where we sold more than \$900 million of the iShares Japan exchange-traded fund (the “EWJ”) and purchased a basket of underlying common shares designed to replicate the MSCI Japan Index. Outside of Japan, the major activity included purchases of BG Group (\$63.6 million), L’Oreal (\$39.8 million), BHP Billiton (\$33.1 million) and Allianz (\$30.3 million). Major sales included Telecom Italia (\$39.7 million), Publicis Group (\$36.7million) and Renault (\$32.9 million).
- We significantly reduced our hedge on the currency exposure of the Japanese equity portfolio, with the total hedge down to \$432 million from nearly \$2.9 billion as of August 31, 2009. We also hedged a small portion of our Japanese equity exposure via listed options as detailed on Exhibit 4.
- Fushan International Energy Group Limited, which is incorporated in Hong Kong, will be classified as an emerging market company based upon our review of the various factors as set forth in the State Investment Council Regulations. G-Resources Group, which is incorporated in Bermuda, will be classified as a developed market company based upon our review of the various factors as set forth in the State Investment Council Regulations.

Alternatives

- During September we funded \$150.7 million of commitments to alternative investments. The largest investment was an additional \$50 million to the Schroder Commodity Portfolio. Other investments include \$13.3 million to LaSalle Asia Opportunity Fund II, \$10.2 million to Silver Lake Partners III, and \$8.3 million to Sheridan Production Partners.

Cash Management Fund

- Total assets in the Cash Management Fund were \$14.0 billion as of September 30, 2009. The current yield is 0.40% for state participants and 0.30% for “non-State” participants.
